

D9350 Disc/Drum Brake Lathe

The D9350 has infinitely adjustable feed rate allowing for easier drum cutting. Fast and slow setting allows cutting the rotor. There are 3 spindle speeds, 70, 88 & 188 rpm.

Features:

1. Work lamp for easier working in poorer light.
2. High efficiency: Advanced design allows to quickly change from rotor to drum.
3. Silence belt: High quality silence belt helps increase the precision of the surface.
4. Safe work area: The chip bin and funnel help to keep the work place cleaner and safer.
5. Tool board: A low tool board to store adapters conveniently ready for use.
6. Work bench: Supplied as standard with the D9350 Lathe.
